A Added as per Pharmacy Quality Scheme (PQS) 2022/2023 Palliative and End of Life Care Action Plan

NOTE 1: Advice for dexamethasone injection dosing in palliative care:

For practical purposes: 3.3mg/ml injection may be considered equal to a 4mg tablet.

Nurses will administer according to the following:

For Dexamethasone 3.3mg/ml Injection (Hameln / Hospira / Wockhardt/ Panpharma)

For example, if a prescription is 4mg dexamethasone s/c, give 1ml of the 3.3mg/ml injection.
