

FreeStyle
Libre 2

Moving from the FreeStyle Libre 2 sensor to the **NEW** FreeStyle Libre 2 Plus – our first 15-day sensor

We're delighted to introduce you to the next generation of our sensor-based glucose monitoring technology for people living with diabetes. The FreeStyle Libre 2 Plus sensor offers all the ease of the FreeStyle Libre 2 system¹, but now even better².

Moving to the FreeStyle Libre 2 Plus sensor is easy.

What you need to do

You do not need to do anything; we will inform your GP practice to have your repeat prescription changed. You can continue to use the FreeStyle Libre 2 sensor in the meantime.

The FreeStyle Libre 2 Plus sensor conveniently works with the existing FreeStyle LibreLink app¹ and the FreeStyle Libre 2 reader.

You do not need to update the app or change your reader. Simply start your FreeStyle Libre 2 Plus sensor with either the app or the reader. The last 90 days of existing stored data will be saved.

What's the difference between the FreeStyle Libre 2 sensor and the FreeStyle Libre 2 Plus sensor?

Just like the FreeStyle Libre 2 sensor, the FreeStyle Libre 2 Plus sensor is small, discreet¹ and convenient – now with added benefits:

Extended sensor wear

Easy to use and comfortable to wear for up to 15 days², only 2 sensors per month.

Even better performance³

Outstanding 15-day accuracy, including strong low-end performance¹, without finger pricks⁴.

Optional glucose alarms⁵

Reliable alarm performance¹, with 3 optional alarms (low, high and signal loss).

Partnerships with insulin pumps

Designed to work with Insulet's next-generation Omnipod[®] 5 Automated Insulin Delivery System, our sensor and Omnipod[®] 5 create one easy, integrated experience.

The #1 sensor-based glucose monitoring system used worldwide⁶ – now even better

1. Data on file, Abbott Diabetes Care, Inc. **2.** Haak, T., *Diabetes Ther.* (2017): <https://doi.org/10.1007/s13300-016-0223-6>. **3.** Based on performance characteristics of the FreeStyle Libre 2 sensor and the FreeStyle Libre 2 Plus sensor. **4.** Finger pricks are required if glucose readings and alarms do not match symptoms or expectations. **5.** Notifications will only be received when alarms are turned on and the sensor is within 6 metres unobstructed of the reading device. **6.** Data on file, Abbott Diabetes Care, Inc. Based on the number of users worldwide for the FreeStyle Libre portfolio compared to the number of users for other leading personal use sensor-based glucose monitoring systems.

We're here to help you to achieve better diabetes control^{1,2}
