Libre 3

PLUS

Introducing the Libre 3 Plus sensor.

**The world's smallest^{1,2}, thinnest
and most discreet² 15-day sensor**

Images are for illustrative purposes only. Not actual patient.
The indication for children (age 2–12) is limited to those who are supervised by a carer who is at least 18 years of age. A carer at least 18 years old is responsible for supervising, managing, and assisting the child in using the FreeStyle Libre 3 system and interpreting its readings.

FreeStyle Libre 3 **PLUS**

Our newest and most advanced continuous glucose monitoring (CGM) sensor, designed to fit into your life.

WHAT'S NEW:

15 **15-day sensor wear:** 50% longer than other brands³

 **Indicated for ages 2 years and older⁴:** the FreeStyle Libre 3 system can help you make treatment decisions without confirmatory finger pricks⁵

PLUS ALL THE GREAT FEATURES OF THE LIBRE 3 SENSOR:

- **About the size of a one-pound coin:** small, thin and discreet²
- **Real-time glucose readings:** check your glucose values on your smartphone⁶, automatically updated every minute
- **Optional alarms:** set customisable alarms to know when your glucose is too low or too high, or if there is a loss of signal⁷
- **Connected care:** combine the Libre 3 Plus sensor with the mylife Loop AID system⁸ for easier diabetes management

The Libre 3 Plus sensor is compatible with the current FreeStyle Libre 3 system, for an easy transition

To find out more about the Libre 3 Plus sensor, visit FreeStyle.Abbott/uk-en/products/freestyle-libre-3.html or scan the QR code

AID=automated insulin delivery.

1. Among patient-applied glucose sensors. 2. Data on File, Abbott Diabetes Care, Inc. 3. Dexcom G6 & Dexcom G7 User Manuals. 4. The indication for children (age 2–12) is limited to those who are supervised by a carer who is at least 18 years of age. A carer at least 18 years old is responsible for supervising, managing, and assisting the child in using the FreeStyle Libre 3 system and interpreting its readings. 5. Finger pricks are required if glucose readings and alarms do not match symptoms or expectations. 6. The FreeStyle Libre 3 app is only compatible with certain mobile devices and operating systems. Please check our website for more information about device compatibility before using the app. Use of the FreeStyle Libre 3 app may require registration with LibreView. 7. Notifications will only be received when alarms are turned on and the sensor is within 10 metres unobstructed of the reading device. 8. FreeStyle Libre 3 Plus is authorised to work with the mylife Loop automated insulin delivery system, including the mylife CamAPS FX app and mylife YpsoPump insulin pump. For use of the FreeStyle Libre 3 Plus sensor with the mylife Loop, refer to the labelling provided with the mylife CamAPS FX app.
