			200	£6.00		

* NHSE Commissioning Recommendations (v4 2nd June 2025)

<https://www.england.nhs.uk/publication/commissioning-recommendations-blood-glucose-and-ketone-meters-testing-strips-and-lancets/>

** ALLY lancets, GlucoRx lite safety lancets to be launched on drug tariff

Notes:

Lancets listed above meet N&W recommendation for optimal gauge size (30g) for comfort and sufficient volume of blood for testing (where available as per NHSE-listed products).

Although a higher gauge of lancet is generally less painful, it may not provide sufficient blood for testing.

TWO safety lancets (**Neon Verifine Safety and GlucoRX LITE**) are now included in the Norfolk and Waveney list. These are now a *cost-effective option*, to be used *if necessary*. other safety lancets are listed by NHSE but are NOT included as they are more expensive. Neon Verifine Safety lancets or GlucoRx lite may be used where necessary in N&W.
