Top tips for General Skincare:

- Wear Loose fitting clothing
- Good skin hygiene
- Dry skin folds thoroughly
- Avoid scratching

|                                                                  |                                                                                                                                                                                                              |                                                                                                                                                            |                                                                                                                                                                                                              |
